# **Exhibit 1**

May 15, 2015

Mr. Michael Montgomery  
United States Environmental Protection Agency – Region IX  
75 Hawthorne Street  
San Francisco, CA 94105-3901

Dear Mr. Montgomery:

As part of the approved plan to resolve compliance issues with California's program to regulate the injection of Class II fluids, the Division of Oil, Gas, and Geothermal Resources (Division) and the State Water Resources Control Board (State Water Board), on behalf of the State of California, have taken the following steps:

1. **Initiated emergency rulemaking to address injection into sub-10,000 milligrams per liter (mg/L) total dissolved solids (TDS), non-hydrocarbon producing zones.**

On April 2, 2015, the Department of Conservation issued public notice of its intent to adopt emergency regulations to codify the compliance deadlines discussed in previous correspondence between the US EPA and the State, and to establish minimum civil penalties for failure to comply with the compliance deadlines. These regulations were approved by California's Office of Administrative Law on April 20, 2015, and are now in effect.

Under the new regulation, injection into non-exempt, non-hydrocarbon aquifers containing less than 3,000 mg/L TDS must cease by October 15, 2015; injection into non-exempt, non-hydrocarbon-bearing aquifers containing 3,000 to 10,000 mg/L TDS must cease by February 15, 2017; and injection into the 11 specified aquifers must cease by December 31, 2016, absent determination by the US EPA that an aquifer meets the criteria for exemption. The Department is on schedule to initiate permanent rulemaking by June 1, 2015 as outlined in the approved plan. A copy of the regulations is enclosed herewith as Attachment A.

2. **Conducted further well evaluations.**

We are pleased to report that the Division and the State Water Board have completed their review of the Category 1 injection wells in accordance with EPA's letter dated March 9, 2015. Category 1 injection wells are those wells that were

Mr. Michael Montgomery  
May 15, 2015  
Page 2

permitted to inject Class II fluid for disposal purposes into non-exempt, non-hydrocarbon-bearing aquifers. The Division and the State Water Board also included in Category 1 those injection wells that were permitted to inject Class II fluid for disposal purposes into the 11 aquifers that have been historically treated as exempt.

The Division initially identified for EPA a total of 532 Category 1 injection wells, and are treating them in two groups, depending on the water in the zone of injection. The first group consists of 176 injection wells injecting into aquifers that are below a concentration of 3,000 mg/L TDS. (See table in Attachment B.) The second group consists of 356 injection wells injecting into aquifers that are above a concentration of 3,000 mg/L TDS. (These 356 wells, broken into three groups, are described in the tables at Attachments C, D and E.) All 532 of these injection wells have been further reviewed by the Division, and the Division has determined that 80 of the 532 injection wells do not meet the criteria for Category 1, as explained below.

*Disposition of the Group of 176 Category 1 Wells.* Of the 176 Category 1 injection wells that were initially identified to EPA as permitted to inject into aquifers that are at or below 3,000 mg/L TDS, the Division has determined that 21 did not meet the Category 1 criteria because they (a) were completed in an aquifer that has a TDS concentration above 10,000 mg/L so an exemption was not needed (1 injection well), (b) were never permitted (1 injection well), or (c) were completed in an aquifer that is exempt (19 injection wells).

The State Water Board has evaluated each of the remaining 155 injection wells in this group to determine whether the injection well has the potential to impact water supply wells. (The State Water Board staff considers an injection well that is injecting into an aquifer with a concentration at or below 3,000 mg/L TDS as having the potential to impact water supply wells if the injection zone is less than 1500 feet below ground surface, or the injection zone is within 500 feet vertically and one mile horizontally of the screened portion of any known existing water supply well.) State Water Board staff has determined that 53 of the 155 injection wells are potentially impacting water supply wells. Pursuant to our joint plan of action, the Division has obtained, through order or operator relinquishment, the shut-in of 23 wells. It is awaiting receipt of additional test data before making a determination as to whether to seek shut-in before the October 15, 2015 compliance schedule date. In addition, the applicable regional water quality control boards have ordered the operators of all 155 injection wells to submit information regarding the quality of the injected fluids, the quality of the aquifer, and the location of any nearby water supply wells.

*Disposition of the Group of 356 Category 1 Wells.* Of the 356 Category 1 injection wells that were initially identified to EPA as permitted to inject into aquifers that are above a concentration of 3,000 mg/L TDS, the Division determined that 59 did not

meet the Category 1 criteria because the injection well (a) was completed in an aquifer that has a TDS concentration above 10,000 mg/L, so an exemption was not needed (47 injection wells), (b) was never drilled or permitted for waste disposal (11 injection wells), or (c) was completed in an aquifer that is exempt (1 injection well).

The State Water Board has evaluated each of the remaining 297 injection wells to determine whether the injection zone is less than 1500 feet below ground surface, such that the portion of the aquifer into which the injection well is injecting might reasonably be expected to supply a public water system. State Water Board staff has determined that 207 of the 297 injection wells have injection zones that are less than 1500 feet below ground surface. Pursuant to our joint plan of action, the Division and the State Water Board will undertake a more in depth review to assess if further action is needed to protect potential drinking water sources ahead of the deadline of February 15, 2017. In addition, the applicable regional water quality control boards plan to order the operators of all 297 injection wells to submit information regarding the quality of the injected fluids, the quality of the aquifer, and the location of any nearby water supply wells.

**3. Revised Enclosure B of the State's February 6<sup>th</sup> letter to incorporate cyclic steam wells not associated to an approved project.**

In addition to the review of the Category 1 wells, the state has identified approximately 3,600 cyclic steam wells that had some injection reported in 2014, and that are shown in Division's databases as not being associated to a permitted injection project. These wells are described in the table in Attachment F.

These wells are producing oil wells for which there is steam injection of limited duration and volume, into zones laden with hydrocarbons. Additionally, some of the formations into which steam is injected have little or essentially no permeability and therefore would not qualify as aquifers. Therefore, most of these wells are very unlikely to pose a threat to potential water supply wells. As reflected in your March 9 letter, these wells will be reviewed and analyzed by July 31, 2015. The enclosed map gives an example of a typical layout of these non-associated wells. (See Attachment G.) They tend to be intermingled with wells in an existing project and likely reflect a deficiency in the proper recording of these wells as associated to a properly permitted project.

**4. Shut in wells and issued orders for further information.**

The Division has ordered shut in, or received operator permit relinquishments, on a total of 23 wells. (Attachment H.) The State Water Board has issued orders for additional water quality information ("13267 Orders") for 157 injection wells. (Attachment I.) As the well review process continues and test results are

Mr. Michael Montgomery  
May 15, 2015  
Page 4

evaluated, the State will issue additional orders if a threat to water supply wells is determined.

We are committed to continue meeting the agreed upon schedule to bring the UIC program into compliance with the Safe Drinking Water Act, and we are also committed to revising the UIC program efficiently, with public safety as our first priority. Please let us know if you have any questions regarding the data attached with this letter.

Sincerely,

Steve Bohlen  
State Oil and Gas Supervisor  
Division of Oil, Gas and Geothermal  
Resources

Sincerely,

Jonathan Bishop  
Chief Deputy Director  
State Water Resources Control Board

## Attachment A: Emergency Regulation

# **AQUIFER EXEMPTION COMPLIANCE SCHEDULE REGULATIONS**

## **FINAL TEXT OF EMERGENCY REGULATIONS**

### **CHAPTER 4. DEVELOPMENT, REGULATION, AND CONSERVATION OF OIL AND GAS RESOURCES Subchapter 2. Environmental Protection**

#### **THE FOLLOWING SECTIONS ARE ADDED TO SUBCHAPTER 2:**

#### **Article 2. Definitions**

##### **1760.1. Definitions.**

(a) The following definitions are applicable to this subchapter:

(1) "Aquifer" means a geological formation, group of formations, or part of a formation that is capable of yielding a significant amount of water to a well or spring.

(2) "Aquifer exemption" means an aquifer exemption proposed by the Division and approved pursuant to the Code of Federal Regulations, title 40, section 144.7.

(3) "Hydrocarbon producing zone" means the portion of an aquifer that is hydrocarbon producing, or can be demonstrated to the Division's satisfaction to contain hydrocarbons that considering their quantity and location are expected to be commercially producible.

(4) "TDS" means milligrams per liter of total dissolved solids content.

NOTE: Authority cited: Section 3013, Public Resources Code. Reference: Section 3106, Public Resources Code; 40 C.F.R. 144.7.

#### **Article 3. Requirements**

##### **1779.1. Deadlines for Obtaining Aquifer Exemption.**

(a) An underground injection project approved by the Division for injection into an aquifer that has not received an aquifer exemption is subject to the following restrictions:

(1) If the portion of the aquifer where injection is approved is not a hydrocarbon producing zone and the groundwater has less than 3,000 TDS, then injection shall cease by October 15, 2015, unless and until there is an aquifer exemption for the aquifer or the portion of the aquifer where injection is occurring.

(2) If the portion of the aquifer where injection is approved is not a hydrocarbon producing zone and the groundwater has between 3,000 and 10,000 TDS, then

injection shall cease by February 15, 2017, unless and until there is an aquifer exemption for the aquifer or the portion of the aquifer where injection is occurring.

(3) If the portion of the aquifer where injection is approved is a hydrocarbon producing zone and the groundwater has less than 10,000 TDS, then injection shall cease by February 15, 2017, unless and until there is an aquifer exemption for the aquifer or the portion of the aquifer where injection is occurring.

(b) For any underground injection project approved by the Division for injection into one of the 11 aquifers listed in subdivision (b)(1), injection shall cease by December 31, 2016, unless and until the U.S Environmental Protection Agency, subsequent to April 20, 2015, determines that the aquifer or the portion of the aquifer where injection is occurring meets the criteria for aquifer exemption.

(1) The following are the 11 aquifers subject to this subdivision:

- (A) The Pico formation within the boundaries of the South Tapo Canyon field;
- (B) The Tumey formation within the boundaries of the Blackwell's Corner field;
- (C) The Kern River formation within the boundaries of the Kern Bluff field;
- (D) The Santa Margarita formation within the boundaries of the Kern Front field;
- (E) The Chanac formation within the boundaries of the Kern River field;
- (F) The Santa Margarita formation within the boundaries of the Kern River field;
- (G) The Walker formation within the boundaries of the Mount Poso field;
- (H) The Olcese formation within the boundaries of the Round Mountain field;
- (I) The Walker formation within the boundaries of the Round Mountain field;

(J) All aquifers within the Bunker Gas field that are not in a hydrocarbon producing zone and that have groundwater that has less than 10,000 TDS; and

(K) All aquifers within the Wild Goose field that are not in a hydrocarbon producing zone and that have groundwater that has less than 10,000 TDS.

(2) For the purposes of this section, the boundaries of the fields listed in subdivision (b)(1) are defined by Division of Oil, Gas, and Geothermal Resources Field Boundary Specifications 1 through 9, dated April 1, 2015, hereby incorporated by reference (publicly available at [ftp://ftp.consrv.ca.gov/pub/oil/UIC Files/Boundary Maps/DOGGR Field Boundary Specifications 1 through 9.pdf](ftp://ftp.consrv.ca.gov/pub/oil/UIC%20Files/Boundary%20Maps/DOGGR%20Field%20Boundary%20Specifications%201%20through%209.pdf)).

(c) Notwithstanding subdivisions (a) and (b), approval of an underground injection project, rescission of an approval of an underground injection project, and restriction of an approval of an underground injection project are all at the discretion of the Division.

(d) Any person who violates this section is subject to a minimum civil penalty of \$20,000 for each well for each day injection occurs. The Division may impose a greater civil penalty based on consideration of the extent of harm, persistence, pervasiveness, and prior occurrences of the violation, but in no case shall the civil penalty be greater than \$25,000 for each well for each day injection occurs.

NOTE: Authority cited: Section 3013, Public Resources Code. Reference: Sections 3106, 3220, 3222 and 3236.5, Public Resources Code; 40 C.F.R. 144.3 and 144.7.

**207 Wells Injecting Into Aquifers that are Reasonably Expected to Supply a Public Water Supply System  
Category 1 (3,000-10,000 TDS)**

**Attachment C**

FieldName	Operator Name	APINumber	Latitude	Longitude	Zone TDS Data	Injection Zone	Top Perf	Number of Water Supply Wells Identified within One Mile Radius
Torrey Canyon	Vintage Production California LLC	11104204	34.37089596	-118.7860283	5832	"102" Zone - Santa Margarita (Miocene) Formation	627	0

Aquifer is reasonably expected to supply a public water system (equivalent to the criteria used to define UIC wells "potentially impacting water supply wells" in Enclosure D)

The top of the injection zone is within 500 vertical feet of a water supply well with a known total depth.

\* APIs 2973297 and 2977806 are injecting into an Aquifer Historically Treated as Exempt (cease injection by December 31, 2016 unless EPA approves an aquifer exemption) and were associated with Information (13267) order issued in August 2014.

**Attachment D: 90 of 356 Category 1  
Injection Wells**

90 Wells Injecting Into Aquifers that are Not Reasonably Expected to Supply a Public Water Supply System

2 PROCEEDINGS

3 THE COURT: This is the Center for  
4 Biological Diversity versus Cal Department of Oil,  
5 Gas and the like.

6 And who do we have here today, starting  
7 with the Plaintiffs?

8 MR. ROSTOV: William Rostov on behalf of  
9 the plaintiffs.

10 MR. KRETZMANN: Hollin Kretzmann for the  
11 plaintiffs.

12 MS. PARDEE: Vera Pardee for the  
13 plaintiffs.

14 MR. DINTZER: Good afternoon, your Honor.  
15 Jeffrey Dintzer on behalf of Aera Energy, Berry  
16 Petroleum, California Resources Corporation, Chevron,  
17 Freeport McMoran, Linn Energy Holdings, and  
18 MacPherson Oil.

19 MR. WICKERSHAM: Good afternoon, your  
20 Honor. Matt Wickersham on behalf of Aera Energy,  
21 Berry Petroleum, California Resources Corporation,  
22 Chevron USA, Freeport McMoran, Linn Energy, and  
23 MacPherson Oil.

24 MR. GREEN: Good afternoon, your Honor.  
25 Blaine Green for Pillsbury on behalf of Western

1 States Petroleum Association as well as California  
2 Independent Petroleum Association and Independent Oil  
3 Producers Agency Industry.

4 MR. YEH: Good afternoon, your Honor. Jack  
5 Yeh from Manatt, Phelps and Phillips on behalf of  
6 California Independent Petroleum Association.

7 THE COURT: Welcome, counselors. Please be  
8 seated.

9 These are motions for intervention. And I  
10 went through these matters and issued a Parties to  
11 Appear.

12 And I read through the statements why the  
13 proposed intervenors hoped to participate, both of  
14 them.

15 I read also the response by the  
16 petitioners, plaintiffs, why not.

17 And I'm going to then permit the moving  
18 party to explain why the court should permit  
19 intervention, and I'm going to permit the responding,  
20 in this case, the Petitioner, to say why not. And  
21 since the intervenors have the burden, they will have  
22 the last word.

23 So who is to speak on behalf of the  
24 intervenors?

25 MR. WICKERSHAM: Your Honor, I would to

1 speak first.

2 THE COURT: Sure. Go ahead.

3 MR. WICKERSHAM: I believe our position is  
4 pretty clear in the papers, so I'm trying to be  
5 brief, and then I'll be happy to answer any question  
6 that you have.

7 We believe that mandatory intervention and  
8 permissive intervention, both currently evident here.

9 Our clients are the energy companies,  
10 operate the vast majority of the wells, and hold the  
11 permits that are currently being challenged by the  
12 petitioner in this action. They are seeking to shut  
13 down thousands of wells that our clients are  
14 currently operating today.

15 Under the test for mandatory intervention,  
16 the first point is that you must make a timely  
17 motion. I don't think there is any real argument  
18 that our motion has not been timely.

19 Also must have a significantly protectable  
20 interest. And this is according to the test that is  
21 set forth in the Arakaki case that's cited in our  
22 briefs.

23 I believe here, our interest is very clear.  
24 Our clients currently hold permits that give them the  
25 right to inject waste water and/or produce water into

1 certain wells.

2 Petitioners have made the argument in their  
3 briefs that our interest is not protectable because  
4 they argue that it's illegal.

5 First, we are contesting that it is  
6 illegal, but there's no need for the court to go into  
7 any type of that determination now with this motion.

8 The cases they cite all concern merit  
9 determinations or issues where the court has made  
10 actual determinations and has determined what type of  
11 relief should be required.

12 None of them have involved intervention.  
13 None of them involve circumstances here where we are  
14 simply asking for the opportunity to be heard on the  
15 question of whether or not it is illegal and where  
16 the line should be drawn between what is a legal  
17 injection firm and what is not.

18 I think the Hodge case, where we cite Hodge  
19 versus Kirkpatrick Development, is illustrative on  
20 that point because it mentions in there that  
21 pre-determination does not need to be made by the  
22 court as to what types of claims or defenses are  
23 available to the proposed intervenor.

24 It's sufficient that their interest may be  
25 impeded or impaired as a result of this action. And

1 here it's clear that our interests would definitely  
2 be substantially impeded if the petitioner would get  
3 the relief that they are seeking for in their motion  
4 for preliminary injunction and in their petition for  
5 writ of mandate, they are asking this court to order  
6 DOGGR to prohibit injection activity as currently  
7 permitted by DOGGR for our clients to operate to  
8 inject into wells.

9           This type of order would be a direct  
10 impairment on their interest. Petitioners try to  
11 draw a distinction between invoking a permit versus  
12 the cessation of activities.

13           I think that the distinction -- it's not  
14 really a difference for purposes of the case law in  
15 terms of the liberal standard that must be applied to  
16 these cases.

17           You cannot rely on these types of formulaic  
18 distinctions between both your permit versus stopping  
19 activities. It's clear that there's going to be an  
20 impediment to our operations, and it's going to be a  
21 substantial impediment to our clients' interests.

22           And finally the last issue is whether or  
23 not DOGGR would adequately represent our interests.  
24 And it's clear that in the case law that DOGGR is not  
25 an adequate representative.

1               In this case, People versus ex rel.  
2 Rominger is very useful for this purpose because it  
3 has a very similar factual setting, where in this  
4 case the State of California tried to sue the county  
5 to invalidate some ordinances.

6               The Sierra Club, interestingly enough,  
7 moved to intervene in that case. The court allowed  
8 intervention, held that their interests were  
9 protected and that the county in this case is not an  
10 adequate representative, because the county is only  
11 interested in preserving its jurisdiction, it does  
12 not have the same interest as our client, or the  
13 Sierra Club in that case, in the underlying activity  
14 that is at stake by that ordinance, or in this case,  
15 the emergency regulations.

16               DOGGR only has an interest in determining  
17 its jurisdiction and in preserving its ability to  
18 enact these types of regulations.

19               Our clients have an interest in maintaining  
20 the operations that they have invested billions of  
21 dollars in building in this state, and which could be  
22 substantially interfered with by petitioner's case.

23               So if you have any questions, please ask.

24               THE COURT: Thank you, counselor. I'm  
25 going to have both intervenors, and then I'll allow

1 you to respond.

2 Go ahead, counselor.

3 MR. GREEN: Thank you, your Honor, for this  
4 opportunity. I am here to present on behalf of the  
5 industry groups. I will keep my points relatively  
6 brief. It's many of the same points you have already  
7 heard from the energy companies.

8 I do want to emphasize just a few things.  
9 One is that when the court is considering an  
10 intervention motion, it is a practical inquiry that  
11 the court is to conduct. And that's actually built  
12 right into the statute of CCP387. 387(b), the  
13 mandatory intervention section speaks directly to  
14 that. It says that:

15 "If the person seeking intervention claims  
16 an interest relating to the property or transaction  
17 which is the subject of the action and that person is  
18 so situated that the disposition of the action may as  
19 a practical matter impair or impede that person's  
20 ability to protect that interest, unless that  
21 person's interest is adequately represented by the  
22 existing parties, the court shall permit that person  
23 to intervene."

24 For mandatory intervention, it is a  
25 practical inquiry, as a practical matter here, it is

1       the oil producers and operators of these injection  
2       wells of whose operations would be impacted by the  
3       preliminary injunction that the plaintiff in this  
4       case seeks.

5           It is not DOGGR. DOGGR doesn't own the  
6       wells, doesn't operate the wells.

7           The plaintiffs are seeking an order,  
8       cessation orders from DOGGR, that would then force  
9       the industry groups and the energy companies to stop  
10      operating.

11          As a practical matter, that's a huge  
12       impairment, and for that reason, mandatory  
13       intervention is warranted.

14          Finally, I want to speak briefly to the  
15       adequacy of representation issues because I think  
16       that's probably the biggest argument, is the argument  
17       that the plaintiffs spent the most time making in  
18       their opposition.

19          With regard to adequacy of representation,  
20       the plaintiffs ignore many of the parts of their own  
21       complaint and their motion for preliminary  
22       injunction, which on their face showed that the  
23       interests of oil producers and the oil industry  
24       really are different from DOGGR's interests.

25          Notably, petitioners in their complaint and

1       their motion for preliminary injunction, concede that  
2       DOGGR has issued cessation orders and has obtained  
3       the cessation of 23 wells, 23 of these injection  
4       wells.

5               Now, that shows that those cessation orders  
6       had occurred independent of the emergency rulemaking  
7       that the plaintiffs are challenging.

8               This emergency rulemaking, plaintiffs  
9       characterize it as authorizing the continuance of the  
10      injection activities while certain deadlines occur.

11               In fact, as you read the emergency  
12      rulemaking carefully, what the regulations do is they  
13      set the deadline by which operations must cease.

14               It's actually a shut in order or shut down  
15      order by certain deadlines, date certain, unless the  
16      aquifers have been exempted by those dates.

17               So it's not a continuing authorization,  
18      it's a shut in schedule.

19               Now, DOGGR continues to have the ability.  
20      And in fact, this is an argument that the plaintiffs  
21      make in their complaint, in their motion to support  
22      preliminary injunction, that DOGGR continues to have  
23      the ability to order shut in prior to those  
24      deadlines.

25               Again, this shows that DOGGR's interests

1       are different and potentially adverse to the oil  
2       producers' interests.

3           We have made a couple of further responses  
4       in terms of the adversity or potential adversity in  
5       the way DOGGR doesn't represent industry group  
6       interests. And I'll reply. I won't belabor the  
7       points here, but we'll be happy to respond to the  
8       questions the court has and the arguments that may  
9       come up with that.

10          THE COURT: Very well.

11          Response?

12          MR. KRETMANN: Good afternoon, your Honor.  
13       This case is about the ongoing and illegal injection  
14       that's occurring throughout the state and continues  
15       every day to contaminate our precious groundwater  
16       resources with benzene and other chemicals.

17          Now, each day that we wait, more and more  
18       irreversible contamination is occurring. So I want  
19       to emphasize for the court before we get into the  
20       reasons to deny the intervention, that the relief  
21       requested is very urgent and is a matter of dire  
22       public in need.

23          I also want to highlight that this case is  
24       very straightforward. The illegality of injections  
25       in this case has been acknowledged and admitted by

1 every relevant agency.

2           The only question is -- the fundamental  
3 question is: Given the admitted and widespread  
4 illegality of these injections, what is DOGGR's  
5 responsibility?

6           Do they have to act now to protect our  
7 groundwater resources from the public or do they have  
8 to act two years from now to cater to the oil  
9 industry's needs.

10          DOGGR has chosen the latter. And  
11 promulgating these emergency regulations, they have  
12 offered a gift to the oil industry, two-year free  
13 pass wherein which they do not need to comply with  
14 the Safe Drinking Water Act.

15          Your Honor, that decision by DOGGR is  
16 inexcusable, and that is why petitioners are before  
17 you challenging that decision by the agency.

18          DOGGR has demonstrated throughout this  
19 process that it is determined to fight tooth and nail  
20 for the oil industry's interests. And that's yet  
21 another reason to deny intervention.

22          As you have heard, the oil industry here is  
23 asserting that they have a right to intervene in the  
24 case.

25          And in order to be admitted to the case,

1 your Honor, they have to meet the statutory  
2 obligations under mandatory or permissive  
3 intervention, and they simply haven't met their  
4 burden.

5 So under mandatory intervention, they first  
6 need to show that they have a legally protectable  
7 interest.

8 Now, they simply haven't shown that in this  
9 case because we are only talking about those  
10 injections that every relevant agency has admitted  
11 are illegal in nature. They do not comply to the  
12 Safe Drinking Water Act.

13 And let's walk through that. So three  
14 simple points.

15 First: The Safe Drinking Water Act  
16 prohibits the illegal injection into underground  
17 sources of drinking water.

18 THE COURT: Has there been a determination  
19 it's illegal?

20 MR. KRETMANN: I'm sorry.

21 THE COURT: Has there been determination,  
22 the judicial determination, that in fact the behavior  
23 is illegal?

24 MR. KRETMANN: DOGGR has admitted that  
25 each of these cases --

1                   THE COURT: You didn't answer my question.

2                   I understand what you said. I understood  
3 your papers. I understand your position. But I  
4 asked this different question which is:

5                   Has there been a legal determination either  
6 by by the Federal Court or by the administrative  
7 agency that, indeed, that what is occurring is  
8 illegal?

9                   MR. KRETMANN: That is not before this  
10 court, your Honor.

11                  We can't go aquifer by aquifer and examine  
12 whether it's qualified for an exemption --

13                  THE COURT: So the answer is no.

14                  MR. KRETMANN: Again, this case cannot  
15 determine whether or not these aquifers qualify for  
16 an exemption.

17                  THE COURT: I understand. Now, you see,  
18 you started off in your argument -- and you  
19 essentially said, We are going to start with the  
20 position for purposes of determining that, in fact,  
21 the defendants do not -- the intervenors don't have  
22 an opportunity to participate.

23                  We start with a statement, everybody feels  
24 it's illegal. And I asked a simple question of  
25 whether or not there has been a judicial

1 determination of any judicial body that, in fact, it  
2 is illegal, other than the concessions or the  
3 admissions or the other statements made.

4 Has there been a determination? Because  
5 that's the start of your argument, is that it's  
6 illegal; and therefore if it's illegal, then they  
7 don't have a right to participate or have a  
8 proprietary interest in something that's illegal.  
9 Right? So I needed to know that first part.

10 So has anybody made that determination?

11 MR. KRETMANN: It's per se illegal under  
12 the Safe Drinking Water Act to inject into a  
13 non-exempt aquifer.

14 THE COURT: Okay. So the answer is no. No  
15 judicial branch, no administrative order has  
16 determined right now that the behavior is illegal.

17 MR. KRETMANN: It has been acknowledged by  
18 every agency that has looked at this matter, your  
19 Honor.

20 THE COURT: You don't have to answer my  
21 question. You have answered my question.

22 Go ahead. You may continue.

23 MR. KRETMANN: The illegality of this  
24 aquifer is beyond question. Even if we wanted to  
25 come to that decision, we wouldn't be able to because

1 the facts aren't in front of us.

2 DOGGR has admitted that it's still  
3 gathering information about what to do with these  
4 aquifers.

5 Now, in light of that, this case isn't  
6 about is it legal or illegal. This case is, given  
7 that no determination has been made, what should we  
8 be doing in the meantime? Should we be allowing  
9 contamination to occur when there are no exemptions  
10 in place?

11 THE COURT: In the sentence you just said,  
12 "no legal determination has been made," is that no  
13 determination has been made that it's illegal?

14 MR. KRETZMANN: The courts have not looked  
15 at it yet because they don't have the information  
16 that's required --

17 THE COURT: That was the answer to my first  
18 question. And that helps. I just wanted to make  
19 sure because that's what I believe occurred.

20 I believe that the behaviors, as you  
21 indicated in your papers occurred.

22 I believe that, in fact, there was a  
23 concession and admission or something on the part of  
24 the agency.

25 I believe that as a result of that

1 acknowledgment, that 23 wells were stopped, or there  
2 is some sort of intervention.

3 And I believe from your statement that  
4 there are thousands yet to be resolved.

5 So if you are telling me -- and I thought  
6 that that was part of your argument -- that the  
7 intervenors do not have a right because, in fact, if  
8 the whole behavior is illegal, therefore, they  
9 wouldn't have a right to something that's illegal,  
10 then I needed to know first whether or not there had  
11 been a judicial determination of illegality, and then  
12 that would take me to one fact, if that has yet to  
13 occur, which I understand you didn't have knowledge,  
14 then that takes me down a different path.

15 MR. KRETMANN: Right. It's impossible to  
16 make that call from a court's perspective because no  
17 one has bothered to go through the exemption process.  
18 And there is a whole lengthy exemption process where  
19 you have to get DOGGR's approval, the State Water  
20 Board's concurrence, written approval from EPA, the  
21 Federal EPA. And none of that has occurred here. So  
22 in that vacuum, where there's no evidence that the  
23 exemption exists, we believe that it is per se  
24 relief.

25 THE COURT: You can have that belief.

1                    You may continue.

2                    MR. KRETZMANN: So as I was pointing out,  
3 the Safe Drinking Water Act prohibits injection into  
4 an underground source of drinking water. That's  
5 plain and simple.

6                    Secondly, the only way around that  
7 exemption is for an express and written approval for  
8 an exemption from the EPA.

9                    And thirdly, that approval does not exist  
10 in any of these cases that we are talking about  
11 today. Again, we are just limiting our case to those  
12 specific injections.

13                  And the illegality, as I mentioned, has  
14 been acknowledged by all the agencies involved in  
15 this case.

16                  So DOGGR and the water board admitted in  
17 February that the division acknowledges that in the  
18 past it has approved underground injection projects  
19 and zoned to its aquifers lacking exemptions.

20                  The DOGGR and Water Board later said in  
21 May, they sent a list of wells injecting into  
22 non-exempt, non-hydrocarbon bearing aquifers.

23                  The State Water Board confirmed in March  
24 that "We believe any injection --"

25                  THE COURT: I don't want to stop you,

1       but -- in fact, I do. I understand that part.

2           MR. KRETZMANN: I don't want to belabor  
3       that point. I just want to point out that every  
4       agency involved here is in agreement.

5           THE COURT: You understand that there is a  
6       difference between evidence and the final  
7       determination by a judge based upon the evidence  
8       that, in fact, there is breach.

9           So you can say "I had a gun. I shot  
10      someone, and as a result he died." But that isn't  
11      murder until there is a determination that that  
12      either could be consistent with self defense. It  
13      could be consistent with all sorts of other things  
14      that would otherwise show that that behavior wasn't  
15      criminal or against the law.

16           So just because someone admitted -- and I  
17      read what you said earlier -- of all those behaviors,  
18      that doesn't lead to the final conclusion that, in  
19      fact, it was illegal. It is your interpretation that  
20      it was indeed illegal and that is the only way one  
21      could fight it.

22           But it's that last determination that the  
23      court would have to determine whether that exists in  
24      order to determine whether or not they had a right.

25           MR. KRETZMANN: I'll just add that we don't

1 have to reach that final determination on the  
2 aquifers in order to resolve this case.

3                 This case is about DOGGR's refusal to  
4 follow the law and the validity of those emergency  
5 regulations.

6                 THE COURT: You may or may not know that  
7 this court sits and does Sequa and Water matters on a  
8 regular basis and deals with the State Resources  
9 Board and other environmental EPA matters on a more  
10 or less regular basis. So I have an understanding of  
11 how all of this works. I just have to see how this  
12 fits.

13                 MR. KRETMANN: And so the oil industry has  
14 not made a showing that it has met its first  
15 requirement here to show that they have a legally  
16 protectable interest. We are only talking about  
17 illegal injection here.

18                 THE COURT: And that's because it's  
19 illegal?

20                 MR. KRETMANN: And we have cited the cases  
21 that say that if you do not have the right to the  
22 legal injection for protectable interest in illegal  
23 activity.

24                 THE COURT: Okay. Once is the charm to say  
25 that. Okay.

1                   MR. KRETMANN: They quibble with our case  
2 law that says -- that did not have to do with  
3 intervention. But your Honor, the other cases that  
4 we do cite on intervention do talk about this  
5 requirement for a legally protectable interest that's  
6 our copy, and the oil industry, and other cases cite  
7 that as well.

8                   This goes to the second requirement of  
9 mandatory intervention, your Honor, which is that  
10 their interests would have to be impaired or impeded.  
11 Again, they do not have an interest to begin with,  
12 that could not be --

13                  THE COURT: What if they did impede?

14                  MR. KRETMANN: If they did, then that's  
15 one requirement out of the four for mandatory  
16 intervention.

17                  THE COURT: Okay.

18                  MR. KRETMANN: The third requirement for  
19 mandatory intervention is that they have to overcome  
20 the presumption of adequate representation. And  
21 here, your Honor, there is no clear case of adequate  
22 representation between the agency and the industry  
23 than DOGGR.

24                  The whole reason we are here is because  
25 DOGGR has put the interests, the private interests of

1 the oil industry above those of the public.

2 THE COURT: That's your conclusion.

3 MR. KRETMANN: That's straight from DOGGR,  
4 your Honor. Their whole reason for promulgating  
5 these regulations, their main justification reads as  
6 follows:

7                 Regulated industry operators develop  
8 long-range business plans with substantial capital  
9 investments based around the operation of injection  
10 wells. Codification of the compliance schedule will  
11 provide the level of certainty operators need to  
12 revise their business plans accordingly.

13                 And it goes on to mention --

14 THE COURT: This is the governmental agency  
15 explaining why they created the orders that they did?

16 MR. KRETMANN: That's correct.

17 THE COURT: Okay.

18 MR. KRETMANN: And then not only in the  
19 explanation of why they created regulations, but also  
20 in their opposition to our preliminary injunction  
21 they did make clear that the reason they are opposing  
22 our lawsuit is to protect the interests of the oil  
23 companies.

24                 They cite to the industry's investments,  
25 the capital investments, they need to protect those.

1           They cite to their own statutory duty to  
2 encourage the wise development of oil and gas  
3 resources.

4           THE COURT: Right.

5           MR. KRETMANN: So it's clear, your Honor,  
6 that this is a quintessential case where the  
7 industry's interests are represented by DOGGR.

8           The very private interest that they alleged  
9 will not be represented --

10          THE COURT: Do you have any other cases  
11 where a government agency similar to this  
12 organization was considered to be adequate to  
13 represent the agencies, to represent the oil  
14 companies?

15          MR. KRETMANN: What do you mean?

16          THE COURT: Well, you are suggesting that  
17 this governmental agency, who indicated in their  
18 record why it is that they made the governmental  
19 decision that they did.

20          Do you have any other examples where other  
21 similar governmental organizations were determined to  
22 be so captured by the private industry that the  
23 representation -- the governmental agency would --  
24 and its behaviors -- would be satisfactory to protect  
25 the civil rights of the private industries?

1                   MR. KRETMANN: I can point to Arakaki,  
2 which the state government was representing the  
3 state's interest, but there was a would-be intervenor  
4 who went through the private pecuniary interests, and  
5 the court determined there that it did not meet the  
6 burden of showing, or making a very compelling  
7 showing, the state did not adequately represent this.

8                   THE COURT: Okay. So do you have any other  
9 organizations where -- I can't think of another  
10 organization right off the top, but where your  
11 position is being supported that a governmental  
12 agency made a decision, gave the reasons that it is  
13 because of those reasons, therefore, the agency --  
14 the area that they are responsible to oversee no  
15 longer has standing?

16                  Do you have anything like that?

17                  MR. KRETMANN: Not on all fours with that,  
18 your Honor, but I think this is a fairly unique  
19 situation where we have an agency that the purpose of  
20 these regulations was to protect the oil industry,  
21 and they made that clear from their reasons that they  
22 gave as justification. They made that clear from  
23 their opposition brief.

24                  THE COURT: So, let's see. I don't know  
25 much about this board. Was it selected by the

1 governor?

2 MR. KRETMANN: The Division of Oil and Gas  
3 and Geothermal Resources, I believe it's appointed by  
4 the governor and within the executive branch.

5 THE COURT: And it's under what portion of  
6 the executive branch?

7 MR. KRETMANN: It's housed within the  
8 Department of Conservation.

9 THE COURT: Okay. So it's the Department  
10 of Conservation, and they have this subgroup, which  
11 is this group, and the people there are appointed by  
12 the governor --

13 MR. KRETMANN: Yes.

14 THE COURT: -- I would imagine. And there  
15 is some sort of review.

16 And you are suggesting that that  
17 organization is sufficient to represent, in this  
18 proceeding, the potential intervenors.

19 MR. KRETMANN: Yes, your Honor.

20 The Simpson Redwood Company points out that  
21 when you are looking at intervention, you do a case  
22 by case and look at the facts at issue.

23 So in this case it's clear that we are just  
24 talking about those wells that DOGGR refuses to  
25 address and allows to continue.

1                   THE COURT: Okay. You may continue.

2                   MR. KRETZMANN: In their briefs, the oil  
3 companies point to -- attempt to make a distinction  
4 between their interests and the interests of DOGGR,  
5 as the case has made clear, when you look at the  
6 ultimate objective of the parties, and it's clear  
7 that those are perfectly aligned here.

8                   Anything having to do with differences in  
9 strategy and litigation tactics, that's not enough to  
10 rise to the level to rebut that presumption of  
11 adequate representation.

12                  Industry groups make similar claims that  
13 their interests would somehow diverge from DOGGR's.  
14 I'll address those here briefly.

15                  The 23 wells that were shut down by DOGGR,  
16 I don't think is proof that their interests would  
17 diverge in this case.

18                  We are talking about the ones that they  
19 refuse to address, the ones that are continuing in  
20 this day and age, are going to allow to continue for  
21 another --

22                  THE COURT: Let's say that this court were  
23 to grant your request and tell DOGGR that they have  
24 to change their behavior. Do you think the oil  
25 companies would sue them?

1                   MR. KRETMANN: I can't make a prediction,  
2 your Honor. I think that --

3                   THE COURT: Well, I think they would  
4 because I'm trying to determine on a case-by-case  
5 basis whether indeed they are of the same  
6 representation or whether they have divergent  
7 interests.

8                   It seems to me that -- I'm having a  
9 difficult time, and that's probably where my  
10 questions are -- define whether there's an identity  
11 of interest between DOGGR and these industries.

12                  But the court struggles with this in  
13 another context. For example, if you are dealing in  
14 depositions and determining whether or not you  
15 have -- you didn't appear at the deposition, but you  
16 nevertheless -- they wanted all the information in  
17 the deposition against your client, then there has to  
18 be a determination whether or not there was a  
19 sufficient identity of the people that were at the  
20 deposition, or the people who wanted to determine  
21 whether or not they had an opportunity to ask the  
22 questions.

23                  I mean, those are the types of issues of  
24 identity that the court struggles with, and I have  
25 that struggle here to determine whether or not DOGGR

1       would do a good job or even care about the interests  
2       of the individual intervenors in this case, whether  
3       they would do what they are required to do under the  
4       charter, which is do the government things that they  
5       are responsible to do. That's the problem that I  
6       have with that.

7                    MR. KRETZMANN: Yeah, I think it's very  
8       apparent in this case of what their interest are.  
9       Not only are they bending over backwards for the  
10      industry by openly allowing violations of the Safe  
11      Drinking Water Act to continue, but they are actively  
12      violating the law for a very narrow interest that the  
13      oil industry is.

14                  You can't make the argument that allowing  
15      illegal injection that continues to contaminate our  
16      state's groundwater resources is somehow in the  
17      public's interest.

18                  THE COURT: Right. Anything more?

19                  MR. KRETZMANN: Furthermore, your Honor,  
20      DOGGR also has a statutory duty under 3106(b), which  
21      states that they must permit owners or operators of  
22      the wells to utilize all methods and practices known  
23      to the oil industry for the purpose of increasing the  
24      ultimate recovery of underground hydrocarbons.

25                  So they have a statutory duty to protect

1 those interests, and that puts it increasing --

2 THE COURT: Can DOGGR take a position  
3 against the intervenors?

4 MR. KRETMANN: Can they?

5 THE COURT: Can they?

6 MR. KRETMANN: It's pretty clear from this  
7 case that they would not.

8 THE COURT: No. I didn't ask that  
9 question. You see, because I'm determining what  
10 rights and relationships, not what they -- I can't  
11 predict their future, but I have to determine whether  
12 or not DOGGR could tell -- could force, could reduce  
13 the rights of these potential intervenors.

14 That's why I asked the question whether or  
15 not they could be sued or would be sued as a result  
16 of you winning.

17 And I think the answer to both of those is  
18 rhetorical because the answer is that indeed if what  
19 is forced upon DOGGR affects the proprietary or  
20 property interests of these intervenors, they would  
21 have probably an obligation or right to sue them for  
22 doing something improper.

23 Or I think that DOGGR could make a decision  
24 that they, in order to carry out their mission, they  
25 would have to sue or punish these intervenors, they

1 would do that too. And I think that as the public  
2 agency, they would be required to do that.

3 MR. KRETMANN: It's possible that in the  
4 future that might arise, your Honor. But I think for  
5 the purposes of this intervention motion, we should  
6 be looking at the interests of -- with respect to the  
7 claims before the court.

8 THE COURT: Okay. Anything else?

9 MR. KRETMANN: I'll add, too, that there  
10 is a separate administrative appeal process for any  
11 permits that are challenged. So there is a different  
12 forum for that.

13 THE COURT: Okay.

14 MR. KRETMANN: Finally, your Honor, the  
15 prerequisites considering any of the factors for  
16 mandatory intervention is timeliness. The oil  
17 industry had every opportunity to file its motion and  
18 keep our preliminary hearing on track, and they  
19 waited for three weeks in order to do that now.

20 Now, timeliness is all about context. And  
21 so what's reasonable delay in some cases would not be  
22 reasonable in others.

23 Here, we are talking about more and more  
24 contamination occurring every day, and for that  
25 reason, they failed to meet that requirement as well.

1                 Now, failing to meet any of those four  
2 requirements is ample grounds to reject mandatory  
3 intervention, and they haven't met a single one of  
4 those.

5                 THE COURT: Okay.

6                 MR. KRETZMANN: In terms of permissible  
7 intervention, they also alleged that they should be  
8 allowed to intervene by discretion of the court.  
9 Here again, the factors under permissive intervention  
10 weigh heavily in favor of denying the intervention.

11                 First, the direct and immediate interest,  
12 we discussed that already. It should not have an  
13 interest, direct, immediate or otherwise, in what's  
14 acknowledged to be violations of the Safe Drinking  
15 Water Act.

16                 Second, the court looks at whether or not  
17 they would enlarge the issues in the case. And from  
18 their motions to intervene, I think it's pretty clear  
19 that they are attempting to introduce a lot of  
20 complexity and unnecessary extraneous issues into  
21 what is really a very straightforward case.

22                 So for example, they mention that --

23                 They talk about the contamination that may  
24 or may not have been found in nearby water supply  
25 wells.

1               Now, that is completely irrelevant to the  
2 provisions that we are talking about here. We are  
3 talking about direct injections into protected  
4 sources of drinking water.

5               That's what's prohibited by the Safe  
6 Drinking Water Act period. Now whether that  
7 contamination overtime ends up in a nearby water  
8 supply well, in a different aquifer is a separate  
9 question and it is not before the court today.

10              The attempts to bring that into this case,  
11 is a transparent attempt to add undue complexity.  
12 And there are several examples of that, your Honor.

13              Thirdly, under permissive intervention,  
14 they have to show that the reasons for intervention  
15 would outweigh the interests of the parties.

16              Now, here we are talking about the narrow,  
17 private interests of the oil companies versus public  
18 interests, which under Sonoma v Rex, public interests  
19 generally outweighs the interest of private  
20 interests, the private parties.

21              The industry interests here, again, *per se*,  
22 illegal, versus public's interests in protecting our  
23 state's groundwater supplies.

24              The relative weight of those interests,  
25 your Honor, could not be farther apart. And for that

1 reason, the third requirement or factor in the  
2 permissive intervention also weighs in favor of  
3 denying intervention.

4 And finally, had the proper procedures been  
5 followed, I'll just add here that the industry groups  
6 failed to attach their complaint in intervention. We  
7 didn't get that until after our opposition was filed.  
8 I think that's pretty prejudicial. Other cases have  
9 found the failure to attach a complaint as ample  
10 grounds to deny intervention, and should be ample  
11 grounds here.

12 So, your Honor, in conclusion, the oil  
13 industry has not met their burden, either under  
14 mandatory or permissive intervention here, and for  
15 those reasons you should deny.

16 THE COURT: Thank you, Counsel.

17 Moving parties?

18 MR. WICKERSHAM: Your Honor, I just have a  
19 few quick points.

20 First, the interest of the energy companies  
21 in this litigation is pretty clear.

22 We have submitted declarations from each of  
23 the companies. I'll just read briefly from one of  
24 them, which has language similar to --

25 THE COURT: You need not. I read them.

1                   MR. WICKERSHAM: Okay. Then, your Honor, I  
2 will move on.

3                   On the point that DOGGR is an adequate  
4 representative, it should be probably apparent, but  
5 being that they argue in the first part that DOGGR  
6 has acknowledged that energy companies have no  
7 interest in this case, and then they argue that DOGGR  
8 was representing the energy companies at some point  
9 when they made those statements, since we do not  
10 agree that we do not have any interest in these  
11 injection activities, it's pretty clear that DOGGR  
12 was not acting as our representative.

13                  Even taking accurate view of what the  
14 evidence is that they are going to rely on in this  
15 case, you cannot argue that DOGGR is acting as a  
16 representative when it is intending to preserve its  
17 jurisdiction and is not at the same stake in the  
18 underlying activities as the energy companies do.

19                  And for that point, I would like to briefly  
20 look at -- well, direct you to the People ex rel.  
21 Rominger case to talk about the fact that we should  
22 not be prohibited from being in litigation to  
23 determine the interest of the oil industry.

24                  THE COURT: Okay. Anybody else?

25                  MR. GREEN: Just briefly, your Honor.

1                 First, about DOGGR fighting tooth and nail  
2 and having the opposition of preliminary injunction  
3 that represents industry group interests, your Honor,  
4 when you review the DOGGR opposition, what you will  
5 see is that when it talks about the balancing of harm  
6 and reasons why an injunction should not be granted  
7 because you have to weigh the harm to public, it does  
8 look at the harm to the public. It doesn't actually  
9 talk about the harm to industry and oil production.  
10 It's critical that the oil industry had an  
11 opportunity to discuss that harm.

12                 Second point out of the three is the  
13 Arakaki case. The Arakaki case talks about a  
14 presumption of adequate representation when an agency  
15 has its constituency, as the proposed intervenor as  
16 its constituency.

17                 In the Arakaki case, it was the State of  
18 Hawaii, there was a constitutional provision that  
19 required the state to direct certain benefits to  
20 native Hawaiians. And it was a group of native  
21 Hawaiians that was seeking to intervene.

22                 In that case, there was another group of  
23 native Hawaiians who had already been permitted to  
24 intervene.

25                 And the court said, Well, since you are

1 already represented by the state because the state  
2 has your constituency by constitution, and you have  
3 already got another group in here, you don't need to  
4 be part of it.

5 The third point is the concept that said  
6 there's perfect alignment between industry groups and  
7 DOGGR. And your Honor has already discussed that  
8 issue extensively with counsel for the plaintiffs.

9 But one of the other things that plaintiffs  
10 ignore is that the industry groups aren't in this  
11 litigation to defend the emergency regulations, the  
12 points that we made in our papers. We are here to  
13 defend against the shut in by preliminary injunction  
14 of these injection wells.

15 Thank you.

16 THE COURT: Thank you very much,  
17 Counselors. I reviewed my notes and you'll get my  
18 decision by Wednesday.

19 That will do it. Thank you, Counsel.

20 MR. KRETMANN: If I might add one more  
21 thing.

22 THE COURT: No, because he gets the last  
23 word. Moving party gets the last word.

24 (Proceedings concluded at 4:43 p.m.)

25 --oo--

1 REPORTER'S CERTIFICATE

2 I, KATHRYN LLOYD, CSR No. 5955, Certified  
3 Shorthand Reporter, certify:

4 That the foregoing proceedings were taken before  
5 me at the time and place therein set forth;

6 That the statements of the parties made at the  
7 time of the proceedings were recorded  
8 stenographically by me and were thereafter  
9 transcribed;

10 That the foregoing is a true and correct  
11 transcript of my shorthand notes so taken.

12 I further certify that I am not a relative or  
13 employee of any attorney of the parties, nor  
14 financially interested in the action.

15 I declare under penalty of perjury under the  
16 laws of California that the foregoing is true and  
17 correct.

18 Dated this \_\_\_\_\_ day of \_\_\_\_\_, 2015.

[DOGGR \(/DOG/Pages/Index.aspx\)](#) > [General Information \(/dog/general\\_information/Pages/Index.aspx\)](#) > [Oil, Gas & Geothermal - Injection Wells \(/dog/general\\_information/Pages/class\\_injection\\_wells.aspx\)](#)

# Oil, Gas & Geothermal- Injection Wells

Injection wells have been an integral part of California's oil and gas operations for over 50 years. Currently, close to 42,000 oilfield injection wells are operating in the state. Injection wells are used to increase oil recovery and to safely dispose of the salt and fresh water produced with oil and natural gas.

Injection wells are classified by the U.S. Environmental Protection Agency into six classes according to the type of fluid they inject and where the fluid is injected, as follows:

- Class I wells - inject hazardous and non-hazardous wastes below the lowermost underground source of drinking water (USDW). Injection occurs into deep, isolated rock formations that are separated from the lowermost USDW by layers of impermeable clay and rock.
- Class II wells - inject fluids associated with oil and natural gas production operations. Most of the injected fluid is brine that is produced when oil and gas are extracted from the earth.
- Class III wells - inject super-heated steam, water, or other fluids into formations to extract minerals. The injected fluids are then pumped to the surface and the minerals in solution are extracted. Generally, the fluid is treated and re-injected into the same formation.
- Class IV wells - inject hazardous or radioactive wastes into underground sources of drinking water. These wells are banned under the Underground Injection Control (UIC) program because they directly threaten public health.
- Class V wells - are injection wells that are not included in the other 4 classes. Some Class V wells are wastewater disposal wells used by the geothermal industry, but most are wells such as septic systems and cesspools. Generally, they are shallow and depend upon gravity to drain or "inject" liquid waste into the ground.
- Class VI wells - inject carbon dioxide (CO<sub>2</sub>) into deep underground subsurface rock formations for long-term storage, or geologic sequestration. The Division does not have primacy to regulate Class VI wells. Class VI wells are permitted and regulated through the US EPA.

In California, all Class II injection wells are regulated by the Department of Conservation, Division of Oil, Gas, and Geothermal Resources, under provisions of the state Public Resources Code and the federal Safe Drinking Water Act. Class II injection wells fall under the Division's UIC program, which is monitored and audited by the U.S. Environmental Protection Agency. In 1983, the Division received EPA primary authority, *primacy*, to regulate Class II wells. The main features of the UIC program include permitting, inspection, enforcement, mechanical integrity testing, plugging and abandonment oversight, data management, and public outreach.

## Frequently Asked Questions

## How Many Injection Wells Are Used in Oil and Gas Operations In California?

About 42,000 injection wells are used for waterflood, steamflood, cyclic steam, and water disposal. These wells are referred to as Class II injection wells in the Underground Injection Control (UIC) program.

## Where Are They?

Injection wells are found in many oil and gas fields located in the counties where oil and gas are produced.

## What Are They For?

Class II injection wells are used to safely dispose of the salt and fresh water produced with oil and gas. Injection is often accomplished in a manner that will increase oil and gas production. About 15 times more water than oil is produced from California's oil and gas fields.

## Does Injected Water Serve a Useful Purpose?

Yes. In more than 90 percent of the Class II injection wells, water is injected into petroleum reservoirs to increase oil production. About 60 percent of California's oil production is a result of Class II injection wells.

## Is Anything Besides Water Injected?

Current state and federal regulations allow nonhazardous fluids produced from oil or gas wells and several other nonhazardous fluids associated with the production process to be injected into a Class II well. These other fluids include diatomaceous earth-filter backwash, thermally enhanced oil recovery cogeneration plant fluid, water-softener regeneration brine, air scrubber waste, drilling mud filtrate, naturally occurring radioactive materials (NORM), slurred crude-oil, saturated soils, and tank bottoms.

## What Is An Injection Well Like?

After a well is drilled, often to depths over 5,000 feet, steel pipe called casing is cemented in the hole. The casing and cement prevent fluids in different zones from mixing with each other or with injected fluids. The casing and cement are perforated opposite the injection zone. To provide an extra layer of protection, tubing is placed in the well to a point just above the perforations and a packer is used near the bottom of the tubing to seal it against the casing. The packer prevents water from entering the space between the tubing and casing when water is injected down the tubing. Several tests are run to make sure the well is operating properly and the injected fluids are confined to the intended injection zone.

## What Is An Injection Zone Like?

An injection zone is usually sandstone, a rock porous and permeable enough to accept injected fluids. Rock beds chosen for injection zones are covered by impermeable beds, like shale, that act as cap rocks, confining injected liquids in the porous beds.

## How Is Produced Water Handled?

After oil and gas are separated from the produced water at the producing well, the water is piped or trucked to the injection site. There, the water is transferred to holding tanks and pumped down a Class II injection well.

## How Often Are Injection Wells Checked?

All injection wells are monitored by Division engineers to ensure the wells are operated properly and have mechanical integrity. Monitoring includes reviewing operational data and running tests like Mechanical Integrity Tests (i.e., spinner,

A Typical Injection Well

temperature, and pressure tests and tracer surveys). In addition, most well sites are inspected annually by Division engineers. Samples of the injected fluids may be taken at any time to confirm compliance.

#### How Are Injection Wells Permitted?

Operators of Class II injection wells must file for a permit with the Division. Before a permit is issued, the proposed injection project is studied by Division engineers and reviewed by the appropriate Regional Water Quality Control Board. Division engineers evaluate the geologic and engineering information, solicit public comments, and hold a public hearing, if necessary. Injection project permits include many conditions, such as approved injection zones, allowable injection pressures, and testing requirements.

#### Are Injection Wells Safe?

Yes. Class II injection wells provide a viable and safe method to enhance oil and gas production and dispose of produced fluids and other fluids associated with oil- and gas-production operations. In California, Class II injection wells have an outstanding record for environmental protection. A peer review conducted by a national organization, the Ground Water Protection Council, found the Division has an excellent program that effectively protects underground sources of drinking water.

### **Oil, Gas & Geothermal- About Us**

The Division of Oil, Gas, and Geothermal Resources (DOGGR) was formed in 1915 to address the needs of the state, local governments, and industry by regulating statewide oil and gas activities with uniform laws and regulations. The Division supervises the drilling, operation, maintenance, and plugging and abandonment of onshore and offshore oil, gas, and geothermal wells, preventing damage to: (1) life, health, property, and natural resources; (2) underground and surface waters suitable for irrigation or domestic use; and (3) oil, gas, and geothermal reservoirs. Division requirements encourage wise development of California's oil, gas, and geothermal resources while protecting the environment.

The Division's programs include: well permitting and testing; safety inspections; oversight of production and injection projects; environmental lease inspections; idle-well testing; inspecting oilfield tanks, pipelines, and sumps; hazardous and orphan well plugging and abandonment contracts; and subsidence monitoring.

DOGGR is the repository for oil, gas, and geothermal well information and publishes [statistics \(/dog/pubs\\_stats/Pages/stats\\_prod.aspx\)](#) on drilling, production, and injection. [General information \(/dog/pubs\\_stats/Pages/general\\_info.aspx\)](#), [technical reports \(/dog/pubs\\_stats/Pages/technical\\_reports.aspx\)](#), and statewide [maps \(/dog/maps/Pages/index\\_map.aspx\)](#) with locations and status of all oil, gas, and geothermal wells are also available.

Division mandated responsibilities are in Section 3000 et seq. of the [Public Resources Code \(/dog/pubs\\_stats/Pages/law\\_regulations.aspx\)](#) and Title 14, Chapter 4 of the [California Code of Regulations \(/dog/pubs\\_stats/Pages/law\\_regulations.aspx\)](#). For additional information, [click here for our contact page \(/dog/Pages/doggr\\_contacts.aspx\)](#).

To date, about 210,000 oil, gas, and geothermal wells have been drilled in California and around 88,500 are still in use. About 4,680 new wells were drilled in the state in 2012. The Division oversees around 570 companies that operate the wells. Daily oil production in 2012 was 541,000 barrels, placing California fourth among oil producing states. California is an important state for [geothermal energy \(/dog/geothermal/Pages/index.aspx\)](#) as well, generating more electricity from geothermal resources than any other state or nation.

There is no statewide severance tax on oil and gas production in California. There are ad valorem (property) taxes in California, administered by each county tax assessor.

There is a small statewide assessment on oil and gas produced [\(/dog/for\\_operators/Pages/assessments.aspx\)](#) that goes to support the Department of Conservation's Division of Oil, Gas, and Geothermal Resources (Division), and is levied pursuant to Article 7, Division 3, of the Public Resources Code.

Annually, the Division presents Outstanding Field Lease and Facility Maintenance Awards to oil, gas, and geothermal operators. The awards recognize lease maintenance efforts that enhance safety and environmental protection above and beyond what is required.

## CALIFORNIA DEPARTMENT OF CONSERVATION ISSUES NOTICE OF EMERGENCY REGULATIONS FOR UNDERGROUND INJECTION

SACRAMENTO – The California Department of Conservation (DOC) today gave notice of an emergency rulemaking package to regulate underground injection related to oil and natural gas production. The emergency rulemaking puts in place concrete steps and deadlines agreed to by the U.S. Environmental Protection Agency for the Division of Oil and Gas Resources and the State Water Resources Control Board

“This is a significant step in California’s commitment to ensure that underground injection practices comply with the federal Safe Drinking Water Act (SDWA) and to quickly eliminate risks to California’s precious water resources,” State Oil & Gas Supervisor Dr. Steven Bohlen said.

DOC’s Division of Oil, Gas, and Geothermal Resources (DOGGR) has primary authority through the U.S. EPA to regulate underground injection wells related to oil and gas operations in California. In 2011, DOGGR raised concerns about underground injection, asking for an independent audit and alerting the Legislature and U.S. EPA to the audit’s findings.

It was discovered that some injection was occurring into aquifers that had not been approved (“exempted”) by the U.S. EPA under the terms of the SDWA. That discovery prompted last summer the beginning of an evaluation of all 50,000 injection wells in the state, with an immediate emphasis on those drilled into zones with the highest water quality.

The rulemaking sets in regulation a schedule the three government agencies have established to eliminate all injection into non-exempt aquifers and ensure California oil and gas activities are compliant with the SDWA. The regulations, available on DOC’s website, will be provided to the Office of Administrative Law on April 9 to ensure they are in place no later than April 30.

Under the emergency regulations, the deadline to stop injecting into aquifers that do not naturally contain oil reservoirs and with water quality of less than 3,000 milligrams per liter/total dissolved solids (TDS) is October 15, 2015, or sooner if it appears that water supplies are possibly threatened. Injection into all other non-exempt aquifers with water quality of less than 10,000 TDS must cease by February 15, 2017. Injection into

eleven other specified aquifers with unclear exemption status must cease by December 31, 2016 if the U.S. EPA determines they should remain exempt. The SDWA does not apply to water with TDS greater than 10,000 TDS.

Injection can continue if the state applies for and receives an aquifer exemption from U.S. EPA. Even if an aquifer has very low TDS (the state and federal standard for drinking water is 500 TDS), an exemption may be granted if the water naturally contains oil or high levels of minerals such as arsenic or boron, making the water unfit for either drinking or agricultural use.

"Our agreement with U.S. EPA is to review all injection wells in the state," Bohlen explained. "Within the next few weeks the high-priority wells will be complete. If they are too close to a beneficial use well, we will issue an order to shut them down. We've already closed down 23 injection wells. We understand public concern about their water. To be clear, no contamination has been found related to oil and gas operations, but we're taking a conservative, cautious approach.

The Office of Administrative Law (OAL) has 10 working days to review the emergency regulations. OAL will consult with DOC before providing any response to comments. If OAL approves the rulemaking package, the interim rules will be in place at the end of the 10-day review. Information about the emergency rulemaking process can be found at [http://oal.ca.gov/Emergency\\_Regulation\\_Process.htm](http://oal.ca.gov/Emergency_Regulation_Process.htm).

Members of the public wishing to comment on the emergency regulations must do so directly to OAL within five calendar days of the posting of the proposed emergency regulations on the OAL website. Submit comments to:

Mail: OAL Reference Attorney  
300 Capitol Mall, Suite 1250  
Sacramento, California 95814

Fax: (916) 323-6826 E-mail:[staff@oal.ca.gov](mailto:staff@oal.ca.gov)

Those submitting a comment to OAL must also submit a copy to the Department:

Mail: Department of Conservation  
801 K Street, MS 24-02  
Sacramento, CA 95814  
ATTN: Aquifer Exemption Emergency Rulemaking
